

## Sunset Crater Volcano National Monument Vegetation Map Class for Montane Grassland

The map class "[Montane Grassland](#)" is composed of the following vegetation associations, each described separately:

- [Blue Grama Herbaceous Vegetation](#)
- [Mountain Muhly Herbaceous Vegetation](#)

This map class is best developed in the western part of the mapping area. It includes native grasslands of blue grama and mountain muhly as well as more disturbed situations that include stands of rabbitbrush or native forb species.
